

PRAJWAL SHELAR

375 76th cross rd Kumaraswamy Layout 1st Stage, Bengaluru, Karnataka 560078

☎ +91 9987909499 ✉ shelar.prajwal.99@gmail.com 🔗 [linkedin.com/in/prajwalshelar](https://www.linkedin.com/in/prajwalshelar) 🐙 github.com/prajwalshelar100

Education

Dayananda Sagar College of Engineering

Master's of Computer Application (MCA) (9.41)

Oct. 2022 – Oct. 2024

Bengaluru, Karnataka

Amity University

Bachelor of Science (B.Sc.) in Physics (Hons.) (9.40)

Aug. 2017 – Aug 2020

Mumbai, Maharashtra

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Software Methodology
- Database Management
- Machine Learning
- Computer Architecture

Technical Skills

Programming Languages: Java, Python, C++, Rust, JavaScript, SQL

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, System Design Fundamentals

Frameworks & Libraries: Django, React.js, Next.js, Vite, Tkinter, CustomTkinter, React Native, Scikit-learn, OpenCV

DevOps, Cloud & Tools: Git, Cloudflare, Azure (Fundamentals), CI/CD (Basics)

IDEs: IntelliJ IDEA, Eclipse, PyCharm, VS Code

Frontend: HTML, CSS, Bootstrap

Operating Systems: Windows, GNU/Linux (Ubuntu, Arch)

Other Skills: Machine Learning, Spatio-temporal Data Analysis, REST API Development, Multilingual - English (Fluent), German (B2), Hindi (Native)

Projects

IMD Rainfall Analyzer & Prediction System | *Python, Scikit-learn, Tkinter, CustomTkinter*

Nov. 2024

- Developed a data-driven application to analyze large-scale IMD rainfall datasets (latitude, longitude, rainfall).
- Implemented machine learning models (Linear Regression) for rainfall forecasting and agricultural yield prediction.
- Designed a modular GUI-based system with integrated analytics, custom analysis modules, and chatbot functionality.

PromptProfile (AI Context & Memory App) | *React Native, AI Systems, Context Engineering*

2026

- Developed a mobile application to build structured personal profiles (e.g., skincare, health) and generate context-aware AI prompts using stored user data.
- Designed a system to address LLM limitations such as hallucination and context loss by injecting persistent, user-specific memory into prompt workflows.
- Integrated product history, user preferences, and camera-based inputs to enhance personalization and improve response relevance.

CRM System (EaseMeUp) | *Django, React.js*

2026

- Developed a full-stack CRM system for managing leads, clients, and business workflows.
- Implemented REST APIs, dynamic dashboards, and workflow automation features for real-world usage.

DeskOS (System-Level Project) | *JavaScript, System Design*

Ongoing

- Designing a system to manage and restore desktop environments, applications, and workflows.
- Focused on automation, productivity enhancement, and system-level state management.

Aether Notes | *Rust, Svelte*

Ongoing

- Built a high-performance note-taking application using Rust backend and Svelte frontend.
- Focused on minimal latency, efficient data handling, and modern UI/UX design.

Automated Facial Recognition & Image Capturing System | *Java, OpenCV*

Apr. 2024

- Developed a computer vision system for real-time face detection and automated image capture.
- Integrated OpenCV with Java to enable efficient detection and seamless user interaction.

Wikipedia Traffic Analysis | *Python, Pandas, NumPy, Scikit-learn*

Oct. 2023

- Built a machine learning model to analyze Wikipedia traffic data and predict primary sources of page access.

Experience

Freelance Software Developer <i>Self-Employed</i> - Designed and developed custom full-stack web applications using Django, React.js, and modern frontend frameworks. - Built lead-generation focused websites, optimizing performance, SEO, and conversion rates. - Worked directly with clients on requirement analysis, system design, and end-to-end delivery of solutions.	2025 – Present <i>Remote</i>
Web Developer <i>Thakur Fabrication Works</i> - Developed and deployed a business website to establish online presence and showcase services. - Designed responsive UI and optimized site performance for better accessibility and user engagement.	2026 <i>India</i>
Open Source Contributor <i>LibreOffice</i> - Contributing to a large-scale open-source office suite, working on real-world codebases and collaborative development. - Gained experience in debugging, code reviews, and maintaining production-level software.	2026 – Present <i>Remote</i>
Project Intern <i>Dayananda Sagar College of Engineering, MCA-VTU</i> - Performed spatio-temporal analysis on large-scale IMD rainfall datasets using Python libraries such as xarray, rioxarray, geopandas, and scikit-learn. - Developed the IMD Rainfall Analyzer system to automate complex data analysis and visualization workflows.	Apr. 2024 – July 2024 <i>Bangalore, Karnataka</i>
Java Developer Intern <i>Motioncut</i> - Worked on Java-based applications using Java SE/EE, Spring, JDBC, and Git. - Collaborated with team members to design and deliver scalable features. - Optimized an expense tracking system using efficient data structures.	Nov. 2023 – Dec. 2023 <i>Bangalore, Karnataka</i>

Achievements

Patent <i>Patent Number: 118561, Published in The Patent Office Journal No. 50/2024</i> - Lead inventor of a patented system for large-scale rainfall data analysis and predictive modeling. - Designed system architecture integrating spatio-temporal data processing and machine learning techniques.	Dec. 2024 <i>Bangalore, Karnataka</i>
Open Source Contribution <i>LibreOffice</i> - Successfully contributed code to the LibreOffice codebase with accepted and merged changes. - Worked on production-level code, debugging issues and collaborating within a global open-source community.	2026 – Present <i>Remote</i>
Amity University, Aminova <i>Event Lead</i> Led a team of 16 members and won the Best Event Award.	Apr. 2018 <i>Mumbai, Maharashtra</i>
